

ERIC A. SKELTON, P.E.
Project Engineer III

EDUCATION: B.S. in Civil Engineering, University of Illinois at Urbana-Champaign, 1995.

CAREER HISTORY:

1998 – 2009 &
2016-Present

The Clayton Engineering Company, St. Louis, Missouri

As a project engineer, Mr. Skelton manages all aspects of a variety of projects. Responsibilities include hydrologic and hydraulic analyses and design including computer modeling of detention basins, culverts, channels, and commercial site floodplain recovery and permitting. Mr. Skelton provides analysis and design for all aspects of commercial, industrial, and residential subdivisions including site layout and grading, sanitary systems, storm sewers, storm water pollution prevention, storm water quality best management practices (BMPs), and road improvements.

Mr. Skelton also provides coordination between contractors, utilities, and local, state and Federal agencies, including the Federal Emergency Management Agency, the Missouri Department of Transportation, the Metropolitan St. Louis Sewer District, Ameren Missouri, Laclede Gas, Missouri American Water Co., Missouri Department of Natural Resources, U.S. Army Corps of Engineers, St. Louis County, St. Charles County, Jefferson County, and various cities in and around the St. Louis metropolitan area.

2010 - 2016

St. Louis County, St. Louis, MO

As a plan review engineer, Mr. Skelton reviewed and approved commercial site plans, residential subdivisions, municipal street projects, MSD projects, traffic control plans, temporary structures, floodplain development, easements, escrows, contract agreements, TGA credits, etc.

1995-1998

Beling Consultants, Moline, IL

As a civil designer, Mr. Skelton was involved in the design of a 4 lane highway, city streets, building site layouts, a high school track, storm sewer systems, etc. Mr. Skelton was a resident engineer for 2 months and a surveying crew chief for 6 months.

1992-1994 (summers)

Illinois Department of Transportation, Peoria, IL

As a summer help Engineering Technician, Mr. Skelton assisted in supervising road construction, and measured and inspected materials.
